

一般糞便檢體採集方法

1. 旋開糞便容器上蓋，以附在蓋上的塑膠棒採樣。
2. 檢體量以和花生米粒一般大小為適宜。
3. 旋緊蓋子，應儘速送至一樓檢驗中心人工報到處。

◎ 注意事項：

1. 若要進行糞便潛血反應檢查是否出血，則須在檢查前 2 天起禁吃含血肉類、動物血之食品、鐵劑、aspirin、維他命 C 等，以避免產生偽陽性。
2. 請勿將衛生紙和糞便同時放入容器。

◎ Stool Routine Collect Method

1. Open the container and use the stirrer to take sample.
2. The sample size should be similar to a peanut.
3. Please close the cap tightly. The sample should be sent to the information counter of laboratory center at first floor as soon as possible.

◎ Announcements

1. To examine whether there is hematochezia or not, you have to stop eating food which contains animal blood, iron, aspirin and vitamin C for two days to prevent the false-positive result.
2. Do not put the stool with tissues into the container together.
